EDUCATION

Shri Guru Gobind Singhji Institute of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering; CGPA: 8.34

Nanded, MH

Sep. 2024 – May 2028

Sangai Highschool

SSC, HSC

Amravati, MH

2021 – 2023

EXPERIENCE

Web Development Intern

May 2026 – July 2026

Progentures Solutions

- Designed and developed **responsive frontend interfaces**, prioritizing a seamless user experience and strict accessibility standards across devices.
- Engineered a custom MongoDB **data collection system** to efficiently streamline, store, and manage robust educational question banks.

PROJECTS

Web Development Projects | HTML, CSS, JavaScript, React.js, Next.js

- Built and launched a **fully responsive event website** to drive digital engagement and registrations for Rmageddon 2k26. rmageddon2026.tech
- Crafted an intuitive **e-commerce user interface** for the TSank t-shirt brand, managing the process from initial design concepts to final deployment. t-sank.vercel.app

LunaBot (Smart India Hackathon) | ROS 2, Python, MATLAB, Gazebo, RTAB-Map

- Collaborated with Team Vision Luna to engineer an **autonomous rover** designed specifically for complex lunar habitat navigation and structural maintenance.
- Spearheaded the implementation of **RTAB-Map for Simultaneous Localization and Mapping (SLAM)** and successfully managed real-time **Digital Twin operations** using MATLAB.

Cold Storage Automation (e-Yantra, IITB) | ROS 2 (Humble), Python, Gazebo, Nav2, CV

- Programmed a collaborative **multi-robot system in ROS 2** to autonomously navigate and optimize the sorting of perishable goods within a simulated cold storage facility.
- Developed precise kinematics and **custom motor control logic** for holonomic robots, specifically adapting algorithms for unique **left/right front wheel hardware configurations**.

Autonomous Quadcopter (Robofest) | Raspberry Pi, OpenCV, Python, DroneKit, YOLOv8

- Assembled and programmed a custom quadcopter for **autonomous flight**, utilizing onboard edge computing to process real-time environmental data.
- Led the software engineering efforts by integrating **YOLOv8 via OpenCV**, achieving highly accurate and latency-free **real-time object detection** from aerial feeds.

ACHIEVEMENTS

- Smart India Hackathon (SIH) Finalist**: Reached the grand finale and interacted with ISRO scientists.
- e-Yantra Robotics Competition (Software Edition)**: Secured **All India Rank (AIR) 3** out of nationwide participating teams.
- ISRO Bharatiya Antariksh Hackathon**: Actively participated in technical problem-solving challenges.
- Gujarat Robofest 5.0**: Reached the finals of this highly competitive national-level robotics competition.
- MHT-CET**: Scored in the **97.52 percentile** in Maharashtra's state-level engineering entrance examination.
- Algorithmic Problem Solving**: Successfully solved **300+ Data Structures and Algorithms (DSA)** questions on LeetCode.

TECHNICAL SKILLS

Languages: C/C++, JavaScript, Python, HTML/CSS

Frameworks & Backend: Next.js, React.js, Node.js, Express.js, Supabase

Libraries: Tailwind CSS, React Hook Form, Zustand, Zod, Recharts, NumPy, Pandas

Tools: Git, GitHub, Figma, VS Code, PyCharm, IntelliJ
